

Using your preventive benefits

YOUR PREMIERA BLUE CROSS BLUE SHIELD OF ALASKA PLAN PAYS IN-NETWORK PREVENTIVE SERVICES IN FULL

You'll get the most value from these benefits by choosing a provider in your plan's network. Getting timely preventive care is one way to detect potential health issues before they become serious and possibly expensive to treat.

So take advantage by following these simple steps:

- 1 Schedule your annual exam and vaccinations with your provider right away!
- 2 When you make your appointment, be sure to tell the scheduler that you want a preventive exam.
- 3 Bring this flyer with you to show your provider what's considered preventive and covered in full under your medical plan. Talk with your provider about preventive services that are right for you.

Keep in mind

During your visit, your provider may find a problem that needs more screening or tests to pinpoint the issue. Also, if you manage an ongoing health issue, your provider may run further tests. Screenings and tests that diagnose or monitor your condition are not preventive services and are subject to your annual plan deductible and coinsurance. Recommended age and frequency of preventive services varies.

If you have any questions about your preventive coverage, call the customer service number on the back of your member ID card.

These services are based on guidelines required under state or federal law. The guidelines are changed from time to time and come from:

- Services that the U.S. Preventive Services Task Force has given an A or B rating
- Vaccinations that the Centers for Disease Control and Prevention recommends
- Screening and other care for women, babies, children, and teens that the Health Resources and Services Administration recommends
- Services that meet legal requirements in Washington state

Consult your benefit booklet for confirmation of benefits and coverage for these services. See our preventive care medical policy at premera.com/medicalpolicies/10.01.523.pdf

SERVICES, SCREENINGS, AND TESTS

Service	Additional details	Covered as preventive for:
