## Claims Editor - What If Tool

The "What If Tool" allows a provider to enter a combination of codes that the provider may wish to bill and receive an national description of how Premera's claims editing software generally edits the code combination submitted. The provided by the Tool is based solely on the information provided and does not take into account any other claims history, eligibility, benefit, pricing or other member or group specific information.

**Declined** - Procedure Code 99213 [OFFICE OUTPT EST 15 MIN] has an Unbundle relationship with Procedure Code 20550 [INJECTION 1 TENDON SHEATH/LIGAMENT APONEUROSIS] on Claim Message\_ID1, Ext/Int Line ID [2/2]. [Hide full explanation](#)

Evaluation and Management (E/M) services are included in the surgical package of procedures that are assigned a global day period of 000, 010, 049, or 090 unless an appropriate modifier is used to override the edit. CPT and certain Healthcare Common Procedure Coding System (HCPCS) codes are assigned a global day designation of 000, 010, 090, XXX, YYY, ZZZ, and MMM in the National Physician Fee Schedule (NPFS) Relative Value File, published by the Centers for Medicare and Medicaid Services (CMS).

Global day edits follow the current CPT? Professional Edition Surgical Package guidelines and the CMS Global Day Policy. The edits utilize the global day assignments from the NPFS. Additionally, CPT codes designated as MMM in the NPFS have the following global day assignment based on an interpretation of the American Congress of Obstetrics and Gynecology's (ACOG) definition of the postpartum period:

? Null days (global day concept does not apply) = 59425, 59426, and 59430

? 0 days = 59409, 59412, 59414, 59514, 59612, and 59620

? 49 days = 59400, 59410, 59510, 59515, 59610, 59614, 59618, and 59622
