WHO WE ARE

A customer-focused, local health plan

Our customers are at the heart of everything we do. We value our customers' feedback and their thoughts guide how we improve Premera's member experience. To strengthen our mission, Premera hires those who act with compassion, empathy, and humanity. And beyond our members, we are active in our local communities and advocate for positive changes in healthcare.

An integrated health management approach

We manage integrated medical and pharmacy benefits with a holistic view of our customers' health. Sophisticated analytics and hands-on case management help healthcare work better.

A nationally recognized, value-based formulary process

Our formulary system combines rigorous clinical evidence, cost effectiveness, and transparency. Decisions are made by our independent local expert P&T committee. Premera's tier placement helps customers easily understand which products are high value. These strategies reduce Rx trends with less negative impact to our members.*

A comprehensive learning experience

Our program provides experiences in a variety of areas across our company. Our relationship with the University of Washington's highly ranked pharmaceutical outcomes program provides additional learning opportunities, including precepting APPE students and participating in outcomes research.
