

Pharmacy

Right Price

EMBEDDED DISCOUNT CARD PROGRAM

For self-funded groups

What is Right Price?

Right Price works behind the scenes to get members the best price for their prescriptions. This means members don't have to track down prescription discount codes or coupons. Right Price takes care of that. It reflects the best price for each eligible drug at that moment. With Right Price prescriptions, in-plan benefits are competitive with or less than prescription discount prices.

How it works

Right Price pulls a discount market price check into the existing "lesser of" logic for pharmacy adjudication of non-specialty retail generic claims. If the discount market price is the lowest, that will be the price the member will pay. These claims will apply to plan accumulators automatically and enables visibility for the plan sponsor. The design of Right Price provides a seamless experience for the member.

	BEFORE RIGHT PRICE		AFTER RIGHT PRICE	
	Coinsurance	Member price	Discount card market price	Member price
Deductible phase (100%)	\$20	\$20	\$12	\$12
Benefit phase (20%)	\$4	\$4	\$3	\$3

Get started with Right Price

Right Price is available to self-funded groups at \$0 per member per month. Groups must opt in and provide 45 days' notice prior to program start.

Contact your **Premera representative or producer** for more information about Right Price.
