Split Fill

SPECIALTY DRUG SPLIT FILL PROGRAM

What is Split Fill?

The Specialty Split Fill program at Accredo helps to reduce drug waste and improve therapy adherence. The program targets select specialty drugs, representing several therapy classes, that have a high risk for early discontinuation in new patients.

How Split Fill works

Split Fill divides the initial fill of certain new-start prescriptions into two smaller days' supply. If the member's prescriber discontinues or changes medication, the amount of the unused prescription will be reduced. Members established on therapy will not undergo any change to their current experience.

Specialty Therapeutic Resource Center (TRC) process for new-start fills only

1. Contact member for initial fill (standard Accredo process) and inform member of split cycle outreach and Day 8 follow-up call.
2. Contact member on Day 8 to assess tolerance.
3. Discuss outreach with physician when appropriate.
4. If the required patient contact is made, ship remainder of split cycle.
5. Transition patient to full-cycle shipments for duration of treatment.

Split Fill qualifications

An employer group must meet these requirements to take advantage of the Split Fill program:

- Self-funded group with integrated pharmacy benefit
- Self-funded group with Accredo Exclusive; no grace fills
- Self-funded group with new or renewing plans starting January 1, 2024

Contact your Premera representative or producer for more information about Split Fill.
