Availity: Online provider tools for Premera HMO Core Plus

Premera has implemented Availity as the one-stop shop secure provider portal for the Premera HMO Core Plus plan needs. Availity is a single-source platform for multiple health plans for checking member eligibility and benefits, submitting prior authorizations and claims, and more. Premera works with Availity because of its local and national presence and capability to deliver functionality beyond our existing secure provider portal. Availity serves both in-area and out-of-area providers through a comprehensive, multi-payer platform that enables ease and efficiency through self-service. Availity is a free service when using Premera Blue Cross HMO as a payer. **Sign in to Availity** or **register and get training.**

Availity offers the quickest way to obtain secure, personalized, easy-to-use information. Providers can:
- Verify member eligibility and benefits (including plan effective dates)
- Verify information about deductibles copay and coinsurance
- Verify benefit limit accumulators
- Check the status of a claim
- Submit a professional or facility claim (free service through the Premera HMO payer)
- Submit and check the status of a prior authorization and referral
- View check and explanation of payment (EOP) information
- Register for electronic funds transfer (EFT) for enrollment or cancellation using Premera and Affiliates as a health plan payer
